

# **BTS Membership & GODL Token Legal Disclaimer**

**Not a Security • Not an Investment • Not a Financial Product**

## **1. Utility Token Within a Membership Ecosystem**

GODL is a commodity-referenced digital utility token used exclusively within the BTS ecosystem. It provides access to membership features, including the educational GODL 90-day Earth-to-Asset experience. GODL does not represent ownership of physical gold, claims on production, rights to delivery or entitlement to any asset.

## **2. Not a Security or Investment Offering**

GODL is a commodity-referenced digital utility token designed solely to provide access to BTS membership features and the educational 90-day Earth-to-Asset experience. While the educational framework references gold and gold prices may naturally rise or fall over time, no assurance, promise, correlation or benefit to GODL or its users is represented or implied. Market movements in gold do not create any entitlement, expectation or guarantee of value for GODL.

Even where certain membership tiers provide access to GODL at an up to 10% discounted access price, such discounts are purely membership benefits, similar to bundled goods or early-access pricing. These discounts must not be interpreted as indicators of future value, appreciation potential or financial gain.

Nothing in the BTS ecosystem constitutes investment advice, a financial promotion, a solicitation to invest or any form of profit-generating opportunity.

## **3. Membership Discounts Are Not Financial Returns**

Some BTS membership tiers include GODL at a discounted access price. These discounts operate like bundled products or early-access pricing and must not be interpreted as investment returns, inducements or profit opportunities.

## 4. No Profit-Sharing or Financial Returns

BTS does **not** provide or participate in: ROI programs, revenue shares, yield mechanisms, staking, profit participation or passive earnings of any kind. Members do not earn money from mining, production cycles or gold activities.

## 5. Referral Commissions = Sales Commissions Only

Referral commissions arise solely from membership sales, not from investment activity or token performance. They are **not** returns on a token, do not derive from gold production, and are not dividend yields or financial payouts. This structure aligns with global affiliate-marketing compliance standards.

## 6. No Guarantees of Future Value

GODL pricing may fluctuate. BTS does not guarantee token appreciation, liquidity, resale value, or exchange access, nor does it represent any correlation with gold prices. Members should participate only for the utility and experience provided.

## 7. Regulatory Positioning

GODL is treated as a utility token and not a regulated financial product under:

- U.S. securities laws
- U.K. Financial Services & Markets Act
- India securities regulations
- EU MiCA (utility-token classification)

BTS does not issue securities or financial instruments, and it does not operate as a financial services provider.

## 8. Member Responsibility

Members acknowledge that they are purchasing membership access, not an investment.

Participation is voluntary, non-financial and based on understanding that no financial return is offered or implied. Members uncertain about digital assets should seek independent legal or financial advice.
